

Intergenerational Community Center

Scope The current Senior Center is in a high profile but also isolated part of town that is not Senior friendly, while Parks and Rec, Veteran Services and Youth Services are centrally located in Town Hall. To create synergy between generations and service providers, it would be best to create a new community center where these different groups could be housed under one roof and as a result, welcome a diversified range of town citizens.

Specific Objectives

- Create a build out plan.
- Gain consensus from all stakeholders.
- Fund it using JT Berry \$. Est cost is \$6M

Challenges

- Brainstorming is required, needs to be balanced against town objectives
- Other towns have reported that providing food service/restaurant is a big deal to draw in people as part of the community center attraction.
- Raising the money \$\$\$\$
